## **PART I - FINANCIAL INFORMATION**

### **Item 1. Financial Statements.**

The unaudited consolidated financial statements of San Miguel Food and Beverage, Inc. (“SMFB” or the “Parent Company”, formerly San Miguel Pure Foods Company Inc.) and its subsidiaries (collectively, the “Group”) as of and for the period ended September 30, 2021 (with comparative figures as of December 31, 2020 and for the period ended September 30, 2020) and Selected Notes to the Consolidated Financial Statements are hereto attached as **Annex “A”**.

### **Item 2. Management’s Discussion and Analysis of Financial Position and Financial Performance.**

The information required by Part III, Paragraph (A)(2)(b) of “Annex C, as amended” is attached hereto as **Annex “B”**.

## **PART II - OTHER INFORMATION**

SMFB may, at its option, report under this item any information not previously reported in a report on SEC Form 17-C. If disclosure of such information is made under this Part II, it need not be repeated in a report on Form 17-C, which would otherwise be required to be filed with respect to such information, or in a subsequent report on Form 17-Q.

## SIGNATURES

Pursuant to the requirements of the Securities Regulation Code, the issuer has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.

Issuer **SAN MIGUEL FOOD AND BEVERAGE, INC. (formerly San Miguel Pure Foods Company Inc.)**

**SAN MIGUEL FOOD AND BEVERAGE, INC.**  
**(Formerly San Miguel Pure Foods Company Inc.)**  
**AND SUBSIDIARIES**

---

**SELECTED NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**  
(Amounts in Millions, Except Per Share Data)

---

**1. Reporting Entity**

San Miguel Food and Beverage, Inc. (SMFB or the “Parent Company”, formerly San Miguel Pure Foods Company Inc.), a subsidiary of San Miguel Corporation (SMC or the “Intermediate Parent Company”), was incorporated and registered with the Philippine Securities and Exchange Commission (SEC) in October 1956.

The Parent Company is a public company under Section 17.2 of the Securities Regulation Code. Its common and preferred shares are listed in the Philippine Stock Exchange (PSE) since 1973 and 2011, respectively. Top Frontier Investment Holdings, Inc. (“Top Frontier”) is the ultimate parent company of SMFB and its subsidiaries (SMFB and its subsidiaries collectively referred to as the “Group”). SMC and Top Frontier are both public companies under Section 17.2 of the Securities Regulation Code.

The accompanying consolidated financial statements comprise the financial statements of the Group and the Group’s interests in joint ventures.

The Group is engaged in various business activities, which as of reporting date include poultry operations, livestock farming and processing and selling of meat products, processing and marketing of refrigerated and canned meat products, manufacturing and marketing of feeds and flour products, specialty oils, spreads, desserts and dairy-based products, snacks and condiments, importation and marketing of coffee and coffee-related products, and grain terminal handling. Following the corporate reorganization in June 2018, the Group is also engaged in manufacturing, selling and distribution of alcoholic and non-alcoholic beverages.

---

**2. Summary of Significant Accounting and Financial Reporting Policies**

The Group prepared its interim consolidated financial statements as at and for the period ended September 30, 2021 and comparative financial statements for the same period in 2020 following the presentation rules under Philippine Accounting Standard (PAS) 34, *Interim Financial Reporting*. The consolidated financial statements of the Group have been prepared in compliance with Philippine Financial Reporting Standards (PFRS).

The consolidated financial statements were approved and authorized for issue in accordance with a resolution by the Board of Directors (BOD) on November 10, 2021.

The consolidated financial statements are presented in Philippine peso and all financial information are rounded off to the nearest million (000,000), except when otherwise indicated.

The principal accounting policies and methods adopted in preparing the interim consolidated financial statements of the Group are the same as those followed in the most recent annual audited consolidated financial statements, except for the changes in accounting policies as explained below.

#### Adoption of Amended Standards

The Financial Reporting Standards Council (FRSC) approved the adoption of a number of amended standards as part of PFRS.

#### *Amended Standards Adopted in 2021*

The Group has adopted the following PFRS effective January 1, 2021 and accordingly, changed its accounting policies in the following areas:

- Coronavirus Disease 2019 (COVID-19) - Related Rent Concessions (Amendments to PFRS 16) beyond June 30, 2021. The optional practical expedient introduced in the 2020 amendments that simplifies how a lessee accounts for rent concessions that are a direct consequence of COVID-19 and which solely applies to reduction in lease payments originally due on or before June 30, 2021 has been extended to June 30, 2022. The economic challenges presented by the COVID-19 pandemic have persisted longer than anticipated. As a result, lessors and lessees are negotiating rent concessions that extend beyond June 30, 2021.

The 2021 amendments are effective for annual reporting periods beginning on or after April 1, 2021 and are applied retrospectively with the cumulative effect of initially applying it as an adjustment to the opening balance of retained earnings.

Earlier application is permitted.

- Interest Rate Benchmark Reform - Phase 2 (Amendments to PFRS 9, *Financial Instruments*, PAS 39, *Financial Instruments: Recognition and Measurement*, PFRS 7, *Financial Instruments: Disclosures*, PFRS 4, *Insurance Contracts*, and PFRS 16, *Leases*). To ensure that financial statements best reflect the economic effects of interest rate benchmark reforms, the Phase 2 amendments were issued and focus on the accounting once a new benchmark rate is in place. The reliefs allow companies not to recognize significant modification gains or losses on financial instruments and mitigate the risk of discontinuations of existing hedging relationships because of changes required by reforms. The amendments address issues that might affect financial reporting during the reform in the following key areas:
  - *Practical Expedient for Particular Changes to Contractual Cash Flows*. As a practical expedient, a company will account for a change in the basis for determining the contractual cash flows that is required by the reform by updating the effective interest rate of the financial instrument. If there are other changes to the basis for determining the contractual cash flows, then a company first applies the practical expedient to the changes required by the reform and then applies other applicable requirements of PFRS 9 to other changes. A similar practical expedient applies to insurers applying PAS 39 and lessees for lease modifications required by a reform.
  - *Relief from Specific Hedge Accounting Requirements*. The amendments enable and require companies to continue hedge accounting in circumstances when changes to hedged items and hedging instruments arise as a result of changes required by the reform. A company is required to amend the formal designation of hedging relationships to reflect the changes

required by the reform. Reliefs are also provided for amounts accumulated in the cash flow hedge reserve, the separately identifiable requirement, groups of items designated as hedged items and retrospective effectiveness assessment under PAS 39.

- *Disclosure Requirements.* To enable users of financial statements to understand the effect of reforms on a company's financial instruments and risk management strategy, additional disclosures are required on how transition to alternative benchmark rates are being managed, quantitative information about financial instruments indexed to rates yet to transition due to benchmark reform at the end of the reporting period, and the extent to which changes to the risk management strategy have occurred due to the risks identified in the transition.

The amendments are effective for annual reporting periods beginning on or after January 1, 2021. Earlier application is permitted. The amendments apply retrospectively, but restatement of comparative information is not required. Reinstatement of a discontinued hedging relationship is required if the hedging relationship was discontinued solely because of changes required by the reform, and that discontinued hedging relationship meets all qualifying criteria for hedge accounting at the date of initial application.

The amendments are still subject to the approval by the FRSC.

Except as otherwise indicated, the adoption of the amended standards did not have a material effect on the interim consolidated financial statements.

#### *Standards Issued But Not Yet Adopted*

A number of new and amended standards are effective for annual periods beginning after January 1, 2021 and have not been applied in preparing the interim consolidated financial statements. Unless otherwise indicated, none of these is expected to have a significant effect on the interim consolidated financial statements.

The Group will adopt the following new and amended standards on the respective effective dates:

- Property, Plant and Equipment - Proceeds before Intended Use (Amendments to PAS 16, *Property, Plant and Equipment*). The amendments prohibit an entity from deducting from the cost of an item of property, plant and equipment the proceeds from selling items produced before that asset is available for use. The proceeds before intended use should be recognized in profit or loss, together with the costs of producing those items which are identified and measured in accordance with PAS 2, *Inventories*.

The amendments also clarify that testing whether an item of property, plant and equipment is functioning properly means assessing its technical and physical performance rather than assessing its financial performance.

For the sale of items that are not part of a company's ordinary activities, the amendments require the company to disclose separately the sales proceeds and related production cost recognized in profit or loss and specify the line items in which such proceeds and costs are included in the statement of comprehensive income. This disclosure is not required if such proceeds and cost are presented separately in the statement of comprehensive income.

The amendments are effective for annual reporting periods beginning on or after

January 1, 2022. Earlier application is permitted. The amendments apply retrospectively, but only to items of property, plant and equipment made available for use on or after the beginning of the earliest period presented in the financial statements in which the company first applies the amendments.

- Onerous Contracts - Cost of Fulfilling a Contract (Amendments to PAS 37, *Provisions, Contingent Liabilities and Contingent Assets*). The amendments clarify that the cost of fulfilling a contract when assessing whether a contract is onerous includes all costs that relate directly to a contract - i.e. it comprise both incremental costs and an allocation of other direct costs.

The amendments are effective for annual reporting periods beginning on or after January 1, 2022 to contracts existing at the date when the amendments are first applied. At the date of initial application, the cumulative effect of applying the amendments is recognized as an opening balance adjustment to retained earnings or other component of equity, as appropriate. The comparatives are not restated. Earlier application is permitted.

- Annual Improvements to PFRS Standards 2018-2020. This cycle of improvements contains amendments to four standards of which the following are applicable to the Group:
  - Fees in the '10 per cent' Test for Derecognition of Financial Liabilities (Amendment to PFRS 9). The amendment clarifies that for the purpose of performing the '10 per cent' test for derecognition of financial liabilities, the fees paid net of fees received included in the discounted cash flows include only fees paid or received between the borrower and the lender, including fees paid or received by either the borrower or lender on the other's behalf.
  - Lease Incentives (Amendment to Illustrative Examples accompanying PFRS 16). The amendment deletes from the Illustrative Example 13 the reimbursement relating to leasehold improvements to remove the potential for confusion because the example had not explained clearly enough the conclusion as to whether the reimbursement would meet the definition of a lease incentive in PFRS 16.
  - Taxation in Fair Value Measurements (Amendment to PAS 41, *Agriculture*). The amendment removes the requirement to exclude cash flows for taxation when measuring fair value, thereby aligning the fair value measurement requirements in PAS 41 with those in PFRS 13, *Fair Value Measurement*.

The amendments are effective for annual reporting periods beginning on or after January 1, 2022. Earlier application is permitted.

- Reference to the Conceptual Framework (Amendment to PFRS 3, *Business Combinations*). The amendments:
  - updated PFRS 3 so that it now refers to the 2018 Conceptual Framework;
  - added a requirement that, for transactions and other events within the scope of PAS 37 or IFRIC 21, *Levies*, an acquirer applies PAS 37 or IFRIC 21 instead of the Conceptual Framework to identify the liabilities it has assumed in a business combination; and
  - added an explicit statement that an acquirer does not recognize contingent assets acquired in a business combination.

The amendments are effective for business combinations occurring in reporting periods starting on or after January 1, 2022. Earlier application is permitted.

- Classification of Liabilities as Current or Noncurrent (Amendments to PAS 1, *Presentation of Financial Statements*). To promote consistency in application and clarify the requirements on determining whether a liability is current or noncurrent, the amendments:
  - removed the requirement for a right to defer settlement of a liability for at least 12 months after the reporting period to be unconditional and instead requires that the right must have substance and exist at the end of the reporting period;
  - clarified that a right to defer settlement exists only if the company complies with conditions specified in the loan agreement at the end of the reporting period, even if the lender does not test compliance until a later date; and
  - clarified that settlement of a liability includes transferring a company's own equity instruments to the counterparty, but conversion options that are classified as equity do not affect classification of the liability as current or noncurrent.

The amendments apply retrospectively for annual reporting periods beginning on or after January 1, 2023, with early application permitted.

- Disclosure of Accounting Policies (Amendments to PAS 1 and PFRS Practice Statement 2, *Making Materiality Judgments*). The key amendments to PAS 1 include requiring entities to disclose material accounting policies rather than significant accounting policies; clarifying that accounting policies related to immaterial transactions, other events or conditions are immaterial and as such need not be disclosed; and clarifying that not all accounting policies that relate to material transactions, other events or conditions are material to the financial statements. The amendments to PFRS Practice Statement 2 provide guidance and examples on the application of materiality to accounting policy disclosures.

The amendments are effective for annual reporting periods beginning on or after January 1, 2023. Earlier application is permitted.

- Definition of Accounting Estimates (Amendments to PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors*). The amendments clarify that accounting estimates are monetary amounts in the financial statements that are subject to measurement uncertainty. The amendments also clarify the relationship between accounting policies and accounting estimates by specifying that an entity develops an accounting estimate to achieve the objective set out by an accounting policy. Developing an accounting estimate includes selecting a measurement technique (estimate or valuation technique) and choosing the inputs to be used when applying the chosen measurement technique. The effects of changes in the inputs or measurement techniques are changes in accounting estimates.

The amendments are effective for annual reporting periods beginning on or after January 1, 2023. Earlier application is permitted. The amendments apply prospectively to changes in accounting estimates and changes in accounting policies occurring on or after the beginning of the first annual reporting period in which the entity applies the amendments.

- PFRS 17, *Insurance Contracts*, replaces the interim standard, PFRS 4, and establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts within the scope of the standard. The new standard reflects the view that an insurance contract combines features of both a financial instrument and a service contract, and considers the fact that many insurance contracts generate cash flows with substantial variability over a long period. PFRS 17 introduces a new approach that: (a) combines current measurement of the future cash flows with the recognition of profit over the period services are provided under the contract; (b) presents insurance service results (including presentation of insurance revenue) separately from insurance finance income or expenses; and (c) requires an entity to make an accounting policy choice portfolio-by-portfolio of whether to recognize all insurance finance income or expenses for the reporting period in profit or loss or to recognize some of that income or expenses in other comprehensive income.

Under PFRS 17, groups of insurance contracts are measured based on fulfillment cash flows, which represent the risk-adjusted present value of the entity's rights and obligations to the policy holders, and a contractual service margin, which represents the unearned profit the entity will recognize as it provides services over the coverage period. Subsequent to initial recognition, the liability of a group of insurance contracts represents the liability for remaining coverage and the liability for incurred claims, with the fulfillment cash flows remeasured at each reporting date to reflect current estimates.

Simplifications or modifications to the general measurement model apply to groups of insurance contracts measured using the 'premium allocation approach', investment contracts with discretionary participation features, and reinsurance contracts held.

PFRS 17 brings greater comparability and transparency about the profitability of new and in-force business and gives users of financial statements more insight into an insurer's financial health. Separate presentation of underwriting and financial results will give added transparency about the sources of profits and quality of earnings.

PFRS 17 is effective for annual periods beginning on or after January 1, 2025. On May 18, 2020, the Insurance Commission deferred the implementation of PFRS 17 to two years after its effective date as decided by the International Accounting Standards Board (IASB). With the deferral, PFRS 17 is effective for annual periods beginning on or after January 1, 2025. Full retrospective application is required, unless it is impracticable, in which case the entity chooses to apply the modified retrospective approach or the fair value approach. However, if the entity cannot obtain reasonable and supportable information necessary to apply the modified retrospective approach, then it applies the fair value approach. Early application is permitted for entities that apply PFRS 9 and PFRS 15, *Revenue from Contracts with Customers*, on or before the date of initial application of PFRS 17.

Deferral of the local implementation of Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Investments in Associates and Joint Ventures: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*.

- Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to PFRS 10 and PAS 28). The amendments address an inconsistency in the requirements in PFRS 10 and PAS 28 in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The amendments require that a full gain or loss is recognized when a transaction involves a business (whether it is housed in a subsidiary or not). A

partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary.

Originally, the amendments apply prospectively for annual periods beginning on or after January 1, 2016, with early adoption permitted. However, on January 13, 2016, the FRSC decided to postpone the effective date until the IASB has completed its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

---

### 3. Segment Information

#### Operating Segments

The reporting format of the Group's operating segments is determined based on the Group's risks and rates of return which are affected predominantly by differences in the products and services produced. The operating businesses are organized and managed by SMC separately according to the nature of the products produced and services provided, with each segment representing a strategic business unit that offers different products and serves different markets.

The Group has three reportable segments, namely: Food, Beer and Non-alcoholic Beverages (NAB), and Spirits. Management identified and grouped the operating units in its operating segments with the objective of transforming the Group into a more rationalized and focused organization. The structure aims to boost efficiencies across the Group and raise effectiveness in defining and meeting the needs of consumers in innovative ways.

The Food segment is engaged in (i) the processing and marketing of branded value-added refrigerated processed meats and canned meat products, manufacturing and marketing of butter, margarine, cheese, milk, ice cream, jelly-based snacks and desserts, specialty oils, salad aids, snacks and condiments, marketing of flour mixes and the importation and marketing of coffee and coffee-related products (collectively known as "Prepared and Packaged Food"); (ii) the production and sale of feeds ("Animal Nutrition and Health"); (iii) the poultry and livestock farming, processing and selling of poultry and fresh meats ("Protein"); and (iv) the milling, production and marketing of flour and bakery ingredients, grain terminal handling, food services, franchising and international operations ("Others").

The Beer and NAB segment is engaged in the production, marketing and selling of fermented, malt-based and non-alcoholic beverages within the Philippines and several foreign markets.

The Spirits segment is engaged in the production of hard liquor in the form of gin, Chinese wine, brandy, rum, vodka and other hard liquor variants which are available nationwide, while some are exported to select countries.

#### Inter-segment Transactions

Segment revenues, expenses and performance include sales and purchases between operating segments. Such transactions are eliminated in the consolidation.

Financial information about reportable segments follows:

Depreciation and amortization recognized in the consolidated statements of income amounted to P3,657 and P3,181 for the periods ended September 30, 2021 and 2020, respectively.

In 2020, property, plant and equipment of a hog farm was reclassified to "Other noncurrent assets - net" account due to the impact of the African Swine Fever that resulted in extended downtime of the facility.

## 5. Dividends

The BOD of the Parent Company approved the declaration and payment of the following cash dividends to common and preferred stockholders:

### 2021

Class of Shares	Date of Declaration	Date of Record	Date of Payment	Dividend Per Share
Common	February 3, 2021	February 18, 2021	March 3, 2021	P0.40
	May 5, 2021	May 20, 2021	June 4, 2021	P0.40
	August 4, 2021	August 19, 2021	September 3, 2021	P0.40

### 2020

Class of Shares	Date of Declaration	Date of Record	Date of Payment	Dividend Per Share
Common	February 3, 2020	February 17, 2020	March 2, 2020	P0.40
	May 27, 2020	June 11, 2020	June 26, 2020	0.40
	August 5, 2020	August 20, 2020	September 4, 2020	0.40
Preferred FBP2	February 3, 2020	February 17, 2020	March 12, 2020	14.14225

## 6. Related Party Disclosures

The Parent Company, certain subsidiaries and their shareholders, associates and joint ventures purchase products and services from one another in the normal course of business. Transactions with related parties are made at normal market prices and terms. Amounts owed by/owed to related parties are collectible/will be settled in cash. An assessment is undertaken at each financial year by examining the financial position of the related party and the market in which the related party operates.

The following are the transactions with related parties and the outstanding balances as at September 30, 2021 and December 31, 2020:

	Year	Revenue from Related Parties	Purchases from Related Parties	Amounts Owed by Related Parties	Amounts Owed to Related Parties	Terms	Conditions
Intermediate Parent Company	September 30, 2021 December 31, 2020	P122 134	P1,123 2,396	P95 148	P442 579	On demand; non-interest bearing	Unsecured; no impairment
Entities under Common Control	September 30, 2021 December 31, 2020	683 890	21,483 26,286	662 658	13,232 11,486	On demand; non-interest bearing	Unsecured; no impairment
Joint Venture	September 30, 2021 December 31, 2020	1 1	335 497	622 628	5 76	On demand; interest bearing	Unsecured; with impairment
Retirement Plan	September 30, 2021 December 31, 2020	- -	- -	- -	47 -	On demand; non-interest bearing	Unsecured
Associate of the Intermediate Parent Company	September 30, 2021 December 31, 2020	- 1	- -	- 1	- -	Less than 3 months; interest bearing	Unsecured; no impairment
Shareholders in Subsidiaries and Its Affiliates	September 30, 2021 December 31, 2020	32 15	2,657 3,016	117 129	51 -	On demand; non-interest bearing	Unsecured; no impairment
<b>Total</b>	<b>September 30, 2021</b>	<b>P838</b>	<b>P25,598</b>	<b>P1,496</b>	<b>P13,777</b>		
Total	December 31, 2020	P1,041	P32,195	P1,564	P12,141		

- a. Amounts owed by related parties consist of current and noncurrent receivables and deposits and share in expenses.

- b. The amounts owed by joint venture includes receivables from Thai San Miguel Liquor Company Limited (TSML) included as part of “Non-trade receivable from related parties” under “Trade and other receivables - net” account in the consolidated statement of financial position. Allowance for impairment losses pertaining to these receivables amounted to P540 as at September 30, 2021 and December 31, 2020.
- c. Amounts owed to related parties consist of trade and non-trade payables arising from management fees, professional fees, insurance and other services rendered by related parties.
- d. The Group has entered into various lease agreements with related parties as a lessor and lessee.
- e. Interest income from amounts owed by TSML, recognized in the consolidated statements of income, amounted to P19 as at December 31, 2020.

---

## 7. Basic and Diluted Earnings Per Share (EPS)

Basic EPS is computed by dividing the net income for the period attributable to equity holders of the Parent Company, net of dividends on preferred shares, by the weighted average number of issued and outstanding common shares during the period, with retroactive adjustment for any stock dividends declared.

For the purpose of computing diluted EPS, the net income for the period attributable to equity holders of the Parent Company and the weighted-average number of issued and outstanding common shares during the period are adjusted for the effect of all potential dilutive debt or equity instruments.

Basic and diluted EPS is computed as follows:

	<b>September 30</b>	
	<b>2021</b>	2020
Net Income attributable to equity holders of the Parent Company	<b>P15,988</b>	P7,846
Less dividends on preferred shares for the period	-	212
Net income attributable to common shareholders of the Parent Company (a)	<b>P15,988</b>	P7,634
Weighted average number of common shares issued and outstanding (in millions) (b)	<b>5,909</b>	5,909
Basic and diluted earnings per common share attributable to equity holders of the Parent Company (a/b)	<b>P2.71</b>	P1.29

As at September 30, 2021 and 2020, the Parent Company has no dilutive equity instruments.

---

## 8. Financial Risk and Capital Management Objectives and Policies

### Objectives and Policies

The Group has significant exposure to the following financial risks primarily from its use of financial instruments:

- Liquidity Risk
- Credit Risk
- Market Risk (Interest Rate Risk, Foreign Currency Risk and Commodity Price Risk)

This note presents information about the exposure to each of the foregoing risks, the objectives, policies and processes for measuring and managing these risks, and for management of capital.

The principal non-trade related financial instruments of the Group include cash and cash equivalents, investments in equity and debt instruments, short-term and long-term loans, and derivative instruments. These financial instruments, except derivative instruments, are used mainly for working capital management purposes. The trade-related financial assets and financial liabilities of the Group such as trade and other receivables, noncurrent receivables and deposits, trade payables and other current liabilities, excluding dividends payable and statutory liabilities, and other noncurrent liabilities arise directly from and are used to facilitate its daily operations.

The outstanding derivative instruments of the Group such as options and currency forwards are intended mainly for risk management purposes. The Group uses derivatives to manage its exposures to commodity price and foreign currency risks arising from the operating activities.

The BOD has the overall responsibility for the establishment and oversight of the risk management framework of the Group.

The risk management policies of the Group are established to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and activities. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The BOD constituted the Audit Committee to assist the BOD in fulfilling its oversight responsibility of the Group's corporate governance process relating to the: a) quality and integrity of the consolidated financial statements and financial reporting process and the systems of internal accounting and financial controls; b) performance of the internal auditors; c) annual independent audit of the consolidated financial statements, the engagement of the independent auditors and the evaluation of the independent auditors' qualifications, independence and performance; d) compliance with tax, legal and regulatory requirements, including the disclosure control and procedures; e) evaluation of management's process to assess and manage the enterprise risk issues; and f) fulfillment of the other responsibilities set out by the BOD.

The Audit Committee shall prepare such reports as may be necessary to document the activities of the committee in the performance of its functions and duties. Such reports shall be included in the annual report of the Group and other corporate disclosures as may be required by the SEC and/or the PSE.

The Audit Committee is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and special reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

The BOD also constituted the Board Risk Oversight Committee to assist the BOD in fulfilling its oversight responsibility of the Group's enterprise risk management (ERM) system to ensure its functionality and effectiveness. The Board Risk Oversight Committee is tasked to develop and oversee the implementation of a formal ERM plan and annually review and advise the BOD of the Group's risk appetite levels and risk tolerance limits based on changes and developments in the business, the regulatory framework and external economic environment. It shall also assess the probability of each identified risk becoming a reality and estimate its possible financial impact and likelihood of occurrence, and oversee management's activities in identifying, monitoring, assessing and managing credit, market, liquidity, operational, legal and other risk exposures of the Group.

#### Interest Rate Risk

Interest rate risk is the risk that future cash flows from a financial instrument (cash flow interest rate risk) or its fair value (fair value interest rate risk) will fluctuate because of changes in market interest rates. The Group's exposure to changes in interest rates relates primarily to the long-term borrowings. Borrowings issued at fixed rates expose the Group to fair value interest rate risk. On the other hand, borrowings issued at variable rates expose the Group to cash flow interest rate risk.

The Group manages its interest cost by using an optimal combination of fixed and variable rate debt instruments. The management is responsible for monitoring the prevailing market-based interest rate and ensures that the mark-up rates charged on its borrowings are optimal and benchmarked against the rates charged by other creditor banks.

On the other hand, the investment policy of the Group is to maintain an adequate yield to match or reduce the net interest cost from its borrowings pending the deployment of funds to their intended use in the operations and working capital management. However, the Group invests only in high-quality securities while maintaining the necessary diversification to avoid concentration risk.

In managing interest rate risk, the Group aims to reduce the impact of short-term fluctuations on the earnings. Over the longer term, however, permanent changes in interest rates would have an impact on profit or loss.

The management of interest rate risk is also supplemented by monitoring the sensitivity of the Group's financial instruments to various standard and non-standard interest rate scenarios.

## Interest Rate Risk Table

The terms and maturity profile of the interest-bearing long-term borrowings, together with its gross amounts, are shown in the following tables:

September 30, 2021	<1 Year	>1 - 3 Years	>3 - 5 Years	>5 Years	Total
<b>Fixed Rate</b>					
Philippine peso denominated	P7,188	P3,183	P35,422	P20,162	P65,955
Interest rate	3.875% - 6.60%	3.2840%-6.00%	3.2840%-5.050%	3.2840%-5.25%	
<b>Floating Rate</b>					
Philippine peso denominated	-	208	238	7,554	8,000
Interest rate	-	BVAL + margin or BSP TDF overnight rate, whichever is higher	BVAL + margin or BSP TDF overnight rate, whichever is higher	BVAL + margin or BSP TDF overnight rate, whichever is higher	
	P7,188	P3,391	P35,660	P27,716	P73,955

December 31, 2020	<1 Year	>1 - 3 Years	>3 - 5 Years	>5 Years	Total
<b>Fixed Rate</b>					
Philippine peso-denominated	P12,629	P7,536	P20,943	P18,392	P59,500
Interest rate	4.2105% - 8.3480%	3.2837% - 8.3480%	3.2837% - 6.00%	3.2837% - 5.25%	
<b>Floating Rate</b>					
Philippine peso-denominated	-	-	-	8,000	8,000
Interest rate	-	-	-	BVAL + margin or BSP TDF overnight rate, whichever is higher	
	P12,629	P7,536	P20,943	P26,392	P67,500

The sensitivity to a reasonably possible 1% increase in the interest rates, with all other variables held constant, would have decreased the Group's profit before tax (through the impact on floating rate borrowings) by P60 and P80 for the period ended September 30, 2021 and for the year ended December 31, 2020, respectively. A 1% decrease in the interest rate would have had the equal but opposite effect. These changes are considered to be reasonably possible given the observation of prevailing market conditions in those periods. There is no impact on the Group's other comprehensive income.

## Foreign Currency Risk

The functional currency is the Philippine peso, which is the denomination of the bulk of the Group's revenues. The exposure to foreign currency risk results from significant movements in foreign exchange rates that adversely affect the foreign currency-denominated transactions of the Group. The risk management objective with respect to foreign currency risk is to reduce or eliminate earnings volatility and any adverse impact on equity. The Group enters into foreign currency hedges using non-derivative instruments to manage its foreign currency risk exposure.

The Group uses natural hedges and/or purchases foreign currencies at spot rates, where necessary, to address short-term imbalances from importations, revenue and expense transactions, and other foreign currency-denominated obligations.

Information on the Group's foreign currency-denominated monetary assets and monetary liabilities and their Philippine peso equivalents are as follows:

	<b>September 30, 2021</b>		December 31, 2020	
	<b>US Dollar</b>	<b>Peso Equivalent</b>	US Dollar	Peso Equivalent
<b>Assets</b>				
Cash and cash equivalents	<b>US\$200</b>	<b>P10,207</b>	US\$174	P8,353
Trade and other receivables	<b>25</b>	<b>1,272</b>	28	1,323
Noncurrent receivables	-	<b>11</b>	-	10
	<b>225</b>	<b>11,490</b>	202	9,686
<b>Liabilities</b>				
Loans Payable	<b>2</b>	<b>102</b>	2	96
Trade payables and other current liabilities	<b>130</b>	<b>6,616</b>	125	5,990
Lease liabilities	<b>1</b>	<b>41</b>		16
	<b>133</b>	<b>6,759</b>	127	6,102
<b>Net Foreign Currency-denominated Monetary Assets</b>	<b>US\$92</b>	<b>P4,731</b>	US\$75	P3,584

The Group reported net gain on foreign exchange amounting to P42 and P38 for the periods ended September 30, 2021 and 2020, respectively, with the translation of its foreign currency-denominated assets and liabilities. These mainly resulted from the movements of the Philippine peso against the US dollar as shown in the following table:

	<b>US Dollar to Philippine Peso</b>
<b>September 30, 2021</b>	<b>51.00</b>
December 31, 2020	48.02
September 30, 2020	48.50
December 31, 2019	50.64

The management of foreign currency risk is also supplemented by monitoring the sensitivity of the Group's financial instruments to various foreign currency exchange rate scenarios.

The following table demonstrates the sensitivity to a reasonably possible change in the US dollar exchange rate, with all other variables held constant, of the Group's profit before tax (due to changes in the fair value of monetary assets and liabilities) and the Group's equity (due to translation of results and financial position of foreign operations):

September 30, 2021	P1 Decrease in the US Dollar Exchange Rate		P1 Increase in the US Dollar Exchange Rate	
	Effect on Income before Income Tax	Effect on Equity	Effect on Income before Income Tax	Effect on Equity
Cash and cash equivalents	(P17)	(P196)	P17	P196
Trade and other receivables	-	(25)	-	25
	(17)	(221)	17	221
Loans Payable	-	2	-	(2)
Trade payables and other current liabilities	40	120	(40)	(120)
Lease liabilities	-	1	-	(1)
	40	123	(40)	123
	P23	(P98)	(P23)	P98

December 31, 2020	P1 Decrease in the US Dollar Exchange Rate		P1 Increase in the US Dollar Exchange Rate	
	Effect on Income before Income Tax	Effect on Equity (Net of Tax)	Effect on Income before Income Tax	Effect on Equity (Net of Tax)
Cash and cash equivalents	(P27)	(166)	P27	P166
Trade and other receivables	-	(27)	-	27
	(27)	(193)	27	193
Loans Payable	-	2	-	(2)
Trade payables and other current liabilities	63	106	(63)	(106)
	63	108	(63)	(108)
	P36	(P85)	(P36)	P85

Exposures to foreign exchange rates vary during the period depending on the volume of overseas transactions. Nonetheless, the analysis above is considered to be representative of the Group's foreign currency risk.

### Commodity Price Risk

Commodity price risk is the risk that future cash flows from a financial instrument will fluctuate because of changes in commodity prices.

The Group, through SMC, enters into various commodity derivatives to manage its price risks on strategic commodities. Commodity hedging allows stability in prices, thus offsetting the risk of volatile market fluctuations. Through hedging, prices of commodities are fixed at levels acceptable to the Group, thus protecting raw material cost and preserving margins. For hedging transactions, if prices go down, hedge positions may show marked-to-market losses; however, any loss in the marked-to-market position is offset by the resulting lower physical raw material cost.

SMC enters into commodity derivative transactions on behalf of the Group to reduce cost by optimizing purchasing synergies within the SMC Group and managing inventory levels of common materials.

The Group uses commodity futures, swaps, and options to manage the Group's exposures to volatility in prices of certain commodities such as soybean meal and wheat.

### Liquidity Risk

Liquidity risk pertains to the risk that the Group will encounter difficulty to meet payment obligations when they fall due under normal and stress circumstances.

The Group's objectives to manage its liquidity risk are as follows: (a) to ensure that adequate funding is available at all times; (b) to meet commitments as they arise without incurring unnecessary costs; (c) to be able to access funding when needed at the least possible cost; and (d) to maintain an adequate time spread of refinancing maturities.

The Group constantly monitors and manages its liquidity position, liquidity gaps and surplus on a daily basis. A committed stand-by credit facility from several local banks is also available to ensure availability of funds when necessary.

The table below summarizes the maturity profile of the Group's financial assets and financial liabilities based on contractual undiscounted receipts and payments used for liquidity management.

<b>September 30, 2021</b>	<b>Carrying Amount</b>	<b>Contractual Cash Flow</b>	<b>1 Year or Less</b>	<b>&gt;1 Year - 2 Years</b>	<b>&gt;2 Years - 5 Years</b>	<b>Over 5 Years</b>

### Credit Risk

Credit risk is the risk of financial loss to the Group when a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from trade and other receivables and investment securities. The Group manages its credit risk mainly through the application of transaction limits and close risk monitoring. It is the Group's policy to enter into transactions with a wide diversity of creditworthy counterparties to mitigate any significant concentration of credit risk.

The Group has regular internal control reviews to monitor the granting of credit and management of credit exposures.

### Trade and Other Receivables

The exposure to credit risk is influenced mainly by the individual characteristics of each customer. However, management also considers the demographics of the Group's customer base, including the default risk of the industry and country in which customers operate, as these factors may have an influence on the credit risk.

The Group obtains collateral or arranges master netting agreements, where appropriate, so that in the event of default, the Group would have a secured claim.

The Group has established a credit policy under which each new customer is analyzed individually for creditworthiness before the standard payment and delivery terms and conditions are offered. The Group ensures that sales on account are made to customers with appropriate credit history. The Group has detailed credit criteria and several layers of credit approval requirements before engaging a particular customer or counterparty. The review includes external ratings, when available, and in some cases bank references. Purchase limits are established for each customer and are reviewed on a regular basis. Customers that fail to meet the benchmark creditworthiness may transact with the Group only on a prepayment basis.

### Credit Quality

In monitoring and controlling credit extended to a counterparty, the Group adopts a comprehensive credit rating system based on financial and non-financial assessments of its customers. Financial factors being considered comprised of the financial standing of the customer while the non-financial aspects include but are not limited to the assessment of the customer's nature of business, management profile,

industry background, payment habit and both present and potential business dealings with the Group.

The credit quality of financial assets is being managed by the Group using internal credit ratings. Credit quality of the financial assets were determined as follows:

High grade includes deposits or placements to reputable banks and companies with good credit standing. High grade financial assets include cash and cash equivalents and derivative assets.

Standard grade pertains to receivables from counterparties with satisfactory financial capability and credit standing based on historical data, current conditions and the Group's view of forward-looking information over the expected lives of the receivables. Standard grade financial assets include trade and other receivables and noncurrent receivables and deposits.

Receivables with high probability of delinquency and default were fully provided with allowance for impairment losses.

Financial information on the Group's maximum exposure to credit risk, without considering the effects of collaterals and other risk mitigation techniques, is presented below.

	<b>September 30 2021</b>	December 31 2020
Cash and cash equivalents (excluding cash on hand)	<b>P47,953</b>	P36,358
Trade and other receivables - net	<b>16,156</b>	20,032
Derivative assets	<b>23</b>	172

31-60 days	557	90	55	702
61-90 days	229	33	30	292
Over 90 days	1,186	731	905	2,822
	P18,344	P1,811	P1,431	P21,586

Various collaterals for trade receivables such as bank guarantees, time deposits and real estate mortgages are held by the Group for certain credit limits.

The Group believes that the unimpaired amounts that are past due by more than 30 days are still collectible, based on historical payment behavior and analyses of the underlying customer credit ratings. There are no significant changes in their credit quality.

The Group computes impairment loss on receivables based on past collection experience, current circumstances and the impact of future economic conditions, if any, available at the reporting period. There are no significant changes in the credit quality of the counterparties during the period.

The credit risk for cash and cash equivalents, derivative assets and financial assets at FVOCI is considered negligible, since the counterparties are reputable entities with high quality external credit ratings.

The Group's exposure to credit risk arises from default of counterparty. Generally, the maximum credit risk exposure of trade and other receivables and noncurrent receivables and deposits is its carrying amount without considering collaterals or credit enhancements, if any. The Group has no significant concentration of credit risk since the Group deals with a large number of homogenous counterparties.

The Group does not execute any credit guarantee in favor of any counterparty.

#### Financial and Other Risks Relating to Livestock

The Group is exposed to financial risks arising from the change in cost and supply of feed ingredients and the selling prices of chicken, hogs and cattle and related products, all of which are determined by constantly changing market forces such as supply and demand and other factors. The other factors include environmental regulations, weather conditions and livestock diseases for which the Group has little control. The mitigating factors are listed below:

- The Group is subject to risks affecting the food industry, generally, including risks posed by food spoilage and contamination. Specifically, the fresh meat industry is regulated by environmental, health and food safety organizations and regulatory sanctions. The Group has put into place systems to monitor food safety risks throughout all stages of manufacturing and processing to mitigate these risks. Furthermore, representatives from the government regulatory agencies are present at all times during the processing of dressed chicken, hogs and cattle in all dressing and meat plants and issue certificates accordingly. The authorities, however, may impose additional regulatory requirements that may require significant capital investment at short notice.
- The Group is subject to risks relating to its ability to maintain animal health status considering that it has no control over neighboring livestock farms. Livestock health problems could adversely impact production and consumer confidence. However, the Group monitors the health of its livestock on a daily basis and proper procedures are put in place.
- The livestock industry is exposed to risk associated with the supply and price of raw materials, mainly grain prices. Grain prices fluctuate depending on the harvest results. The shortage in the supply of grain will result in adverse fluctuation in the price of grain and will ultimately increase the Group's production cost. If necessary, the Group enters into forward contracts to secure the supply of raw materials at a reasonable price.

#### Other Market Price Risk

The Group's market price risk arises from its investments carried at fair value (financial assets at FVPL and FVOCI). The Group manages its risk arising from changes in market price by monitoring the changes in the market price of the investments.

#### Capital Management

The Group maintains a sound capital base to ensure its ability to continue as a going concern, thereby continue to provide returns to stockholders and benefits to other stakeholders and to maintain an optimal capital structure to reduce cost of capital.

The Group manages its capital structure and makes adjustments, in the light of changes in economic conditions. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, pay-off existing debts, return capital to shareholders or issue new shares.

The Group defines capital as paid-in capital stock, additional paid-in capital and retained earnings, both appropriated and unappropriated. Other components of equity such as treasury stock and equity reserves are excluded from capital for purposes of capital management.

The Group monitors capital on the basis of debt-to-equity ratio, which is calculated

as total debt divided by total equity. Total debt is defined as total current liabilities and total noncurrent liabilities, while equity is total equity as shown in the consolidated statements of financial position.

The BOD has overall responsibility for monitoring capital in proportion to risk. Profiles for capital ratios are set in the light of changes in the external environment and the risks underlying the Group's business, operation and industry.

The Group is not subject to externally-imposed capital requirements.

---

## 9. Financial Assets and Financial Liabilities

*Recognition and Initial Measurement.* A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

The Group recognizes a financial asset or a financial liability in the consolidated statements of financial position when it becomes a party to the contractual provisions of the instrument.

A financial asset (unless a trade receivable without a significant financing component) or financial liability is initially measured at the fair value of the consideration given or received. The initial measurement of financial instruments, except for those designated as at FVPL, includes transaction costs. A trade receivable without a significant financing component is initially measured at the transaction price.

### Financial Assets

The Group classifies its financial assets, at initial recognition, as subsequently measured at amortized cost, FVOCI and FVPL. The classification depends on the contractual cash flow characteristics of the financial assets and the business model of the Group for managing the financial assets.

Subsequent to initial recognition, financial assets are not reclassified unless the Group changes the business model for managing financial assets. All affected financial assets are reclassified on the first day of the reporting period following the change in the business model.

The business model refers to how the Group manages the financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. The Group considers the following information in assessing the objective of the business model in which a financial asset is held at a portfolio level, which reflects the way the business is managed and information is provided to management:

- the stated policies and objectives for the portfolio and the operation of those policies in practice;
- how the performance of the portfolio is evaluated and reported to the Group's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how employees of the business are compensated; and

- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

The Group considers the contractual terms of the instrument in assessing whether the contractual cash flows are solely payments of principal and interest. For purposes of this assessment, "Principal" is defined as the fair value of the financial asset on initial recognition. "Interest" is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as profit margin. The assessment includes whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. The Group considers the following in making the assessment:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable rate features;
- prepayment and extension features; and
- terms that limit the Group's claim to cash flows from specified assets.

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

For purposes of subsequent measurement, financial assets are classified in the following categories: financial assets at amortized cost, financial assets at FVOCI (with or without recycling of cumulative gains and losses) and financial assets at FVPL.

*Financial Assets at Amortized Cost.* A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVPL:

- it is held within a business model with the objective of holding financial assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognized in the consolidated statements of income when the financial asset is derecognized, modified or impaired.

The Group's cash and cash equivalents, trade and other receivables, noncurrent receivables and deposits are included under this category.

Cash includes cash on hand and in banks which are stated at face value. Cash

equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

*Financial Assets at FVOCI.* Investment in debt instruments is measured at FVOCI if it meets both of the following conditions and is not designated as at FVPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

At initial recognition of an investment in equity instrument that is not held for trading, the Group may irrevocably elect to present subsequent changes in the fair value in other comprehensive income. This election is made on an instrument-by-instrument basis.

Financial assets at FVOCI are subsequently measured at fair value. Changes in fair value are recognized in other comprehensive income.

Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment on investment in debt instruments are recognized in the consolidated statements of income. When investment in debt instruments at FVOCI is derecognized, the related accumulated gains or losses previously reported in the consolidated statements of changes in equity are transferred to and recognized in the consolidated statements of income.

Dividends earned on holding an investment in equity instrument are recognized as dividend income in the consolidated statements of income when the right to receive the payment has been established, unless the dividend clearly represents a recovery of the part of the cost of the investment. When investment in equity instruments at FVOCI is derecognized, the related accumulated gains or losses previously reported in the consolidated statements of changes in equity are never reclassified to the consolidated statements of income.

The Group has no investment in debt securities.

The Group's investments in equity instruments at FVOCI are classified under this category.

*Financial Assets at FVPL.* All financial assets not classified as measured at amortized cost or FVOCI are measured at FVPL. This includes derivative financial assets that are not designated as cash flow hedge. Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVPL.

At initial recognition, the Group may irrevocably designate a financial asset as at FVPL if the designation eliminates or significantly reduces an accounting mismatch that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on different bases.

The Group carries financial assets at FVPL using their fair values. Attributable transaction costs are recognized in the consolidated statements of income as incurred. Changes in fair value and realized gains or losses are recognized in the consolidated statements of income. Fair value changes from derivatives accounted for as part of an effective cash flow hedge are recognized in other comprehensive income. Any interest earned from investment in debt instrument designated as at

FVPL is recognized in the consolidated statements of income. Any dividend income from investment in equity instrument is recognized in the consolidated statements of income when the right to receive payment has been established, unless the dividend clearly represents a recovery of the part of the cost of the investment.

The Group's derivative assets that are not designated as cash flow hedge are classified under this category.

#### Financial Liabilities

The Group determines the classification of its financial liabilities, at initial recognition, in the following categories: financial liabilities at FVPL and other financial liabilities. All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings, net of directly attributable transaction costs.

*Financial Liabilities at FVPL.* Financial liabilities are classified under this category through the fair value option. Derivative instruments (including embedded derivatives) with negative fair values, except those covered by hedge accounting relationships, are also classified under this category.

The Group carries financial liabilities at FVPL using their fair values and reports fair value changes in the consolidated statements of income. Fair value changes from derivatives accounted for as part of an effective accounting hedge are recognized in other comprehensive income and presented in the consolidated statements of changes in equity. Any interest expense incurred is recognized as part of "Interest expense and other financing charges" account in the consolidated statements of income.

The Group's derivative liabilities that are not designated as cash flow hedge are classified under this category.

*Other Financial Liabilities.* This category pertains to financial liabilities that are not designated or classified as at FVPL. After initial measurement, other financial liabilities are carried at amortized cost using the effective interest method. Amortized cost is calculated by taking into account any premium or discount and any directly attributable transaction costs that are considered an integral part of the effective interest rate of the liability. The effective interest rate amortization is included in "Interest expense and other financing charges" account in the consolidated statements of income. Gains and losses are recognized in the consolidated statements of income when the liabilities are derecognized as well as through the amortization process.

Debt issue costs are considered as an adjustment to the effective yield of the related debt and are deferred and amortized using the effective interest method. When a loan is paid, the related unamortized debt issue costs at the date of repayment are recognized in the consolidated statements of income.

The Group's liabilities arising from its trade or borrowings such as Loans Payable, trade payables and other current liabilities, long-term debt, lease liabilities and other noncurrent liabilities are included under this category.

#### Derecognition of Financial Assets and Financial Liabilities

*Financial Assets.* A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay them in full without material delay to a third party under a “pass-through” arrangement; and either: (a) has transferred substantially all the risks and rewards of the asset; or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of the Group’s continuing involvement. In that case, the Group also recognizes the associated liability. The transferred asset and the associated liability are measured on the basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group is required to repay.

*Financial Liabilities.* A financial liability is derecognized when the obligation under the liability is discharged or cancelled, or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognized in the consolidated statements of income.

#### Impairment of Financial Assets

The Group recognizes allowance for ECL on financial assets at amortized cost and investments in debt instruments at FVOCI.

ECLs are probability-weighted estimates of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e., the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive), discounted at the effective interest rate of the financial asset, and reflects reasonable and supportable information that is available without undue cost or effort about past events, current conditions and forecasts of future economic conditions.

The Group recognizes an allowance for impairment based on either 12-month or lifetime ECLs, depending on whether there has been a significant increase in credit risk since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group’s historical experience and informed credit assessment and including forward-looking information.

The Group recognizes lifetime ECLs for receivables that do not contain significant financing component. The Group uses provision matrix that is based on the Group's historical credit loss experience, adjusted for forward-looking factors specific to the borrowers and the economic environment.

At each reporting date, the Group assesses whether these financial assets at amortized cost and investments in debt instruments at FVOCI are credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit-impaired include observable data about the following events:

- (a) significant financial difficulty of the issuer or the borrower;
- (b) a breach of contract, such as a default or past due event;
- (c) the restructuring of a financial asset by the Group on terms that the Group would not consider otherwise;
- (d) it is becoming probable that the borrower will enter bankruptcy or other financial reorganization; or
- (e) the disappearance of an active market for that financial asset because of financial difficulties.

The Group considers a financial asset to be in default when a counterparty fails to pay its contractual obligations, or there is a breach of other contractual terms, such as covenants.

The Group directly reduces the gross carrying amount of a financial asset when there is no reasonable expectation of recovering the contractual cash flows on a financial asset, either partially or in full. This is generally the case when the Group determines that the borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

The ECLs on financial assets at amortized cost are recognized as allowance for impairment losses against the gross carrying amount of the financial asset, with the resulting impairment losses (or reversals) recognized in the consolidated statements of income. The ECLs on investments in debt instruments at FVOCI are recognized as accumulated impairment losses in other comprehensive income, with the resulting impairment losses (or reversals) recognized in the consolidated statements of income.

#### Classification of Financial Instruments between Liability and Equity

Financial instruments are classified as liability or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as expense or income. Distributions to holders of financial instruments classified as equity are charged directly to equity, net of any related income tax benefits.

A financial instrument is classified as liability if it provides for a contractual obligation to:

- deliver cash or another financial asset to another entity;
- exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavorable to the Group; or
- satisfy the obligation other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of own equity shares.

The components of issued financial instruments that contain both liability and equity elements are accounted for separately, with the equity component being assigned the residual amount after deducting from the instrument as a whole or in part, the amount separately determined as the fair value of the liability component on the date of issue.

#### Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statements of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

The table below presents a comparison by category of the carrying amounts and fair values of the Group's financial instruments:

	September 30, 2021		December 31, 2020	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
<b>Financial Assets</b>				
Cash and cash equivalents	P48,170	P48,170	P37,013	P37,013
Trade and other receivables - net	16,156	16,156	20,032	20,032
Derivative assets (included under "Prepaid expenses and other current assets" account)	23	23	172	172
Financial assets at FVOCI (included under "Investments" account)	5,155	5,155	4,855	4,855
Noncurrent receivables and deposits - net (included under "Other noncurrent assets - net" account)	212	212	226	226
<b>Financial Liabilities</b>				
Loans payable	3,710	3,710	10,780	10,780
Trade payables and other current liabilities (excluding derivative liabilities)	57,197	57,197	54,414	54,414
Derivative liabilities (included under "Trade payables and other current liabilities" account)	322	322	24	24
Long-term debt (including current maturities)	73,468	76,598	67,099	72,007
Lease liabilities (including current portion)	4,673	4,673	4,782	4,802
Other noncurrent liabilities	64	64	78	78

The following methods and assumptions are used to estimate the fair value of each class of financial instruments:

*Cash and Cash Equivalents, Trade and Other Receivables, and Noncurrent Receivables and Deposits.* The carrying amount of cash and cash equivalents, and trade and other receivables approximates fair value primarily due to the relatively short-term maturities of these financial instruments. In the case of noncurrent receivables and deposits, the fair value is based on the present value of expected future cash flows using the applicable discount rates based on current market rates of identical or similar quoted instruments.

*Derivatives.* The fair values of forward exchange contracts are calculated by reference to current forward exchange rates. In the case of freestanding currency

and commodity derivatives, the fair values are determined based on quoted prices obtained from their respective active markets. Fair values for stand-alone derivative instruments that are not quoted from an active market and for embedded derivatives are based on valuation models used for similar instruments using both observable and non-observable inputs.

*Financial Assets at FVOCI.* The fair values of publicly traded instruments and similar investments are based on quoted market prices in an active market.

*Loans Payable, Trade Payables and Other Current Liabilities, and Other Noncurrent Liabilities.* The carrying amounts of Loans Payable and trade payables and other current liabilities approximate fair values due to the relatively short-term maturities of these financial instruments. In case of other noncurrent liabilities, the carrying amount approximates fair value as at reporting date.

*Long-term Debt and Lease Liabilities.* The fair value of interest-bearing fixed rate loans is based on the discounted value expected future cash flows using the applicable market rates for similar types of instruments as of reporting date. As at September 30, 2021 and December 31, 2020, discount rates used ranges from 1.00% to 4.15% and from 1.11% to 2.31% respectively.

#### Derivative Financial Instruments and Hedge Accounting

The Group uses derivative financial instruments, such as forwards, swaps and options to manage its exposure on foreign currency, interest rate and commodity price risks. Derivative financial instruments are initially recognized at fair value on the date the derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative. Changes in the fair value of derivatives that are not designated as hedging instruments are recognized in the consolidated statements of income.

#### *Freestanding Derivatives*

The Group designates certain derivatives as hedging instruments to hedge the exposure to variability in cash flows associated with recognized liabilities arising from changes in foreign exchange rates and interest rates.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The Group also documents the economic relationship between the hedged item and the hedging instrument, including whether the changes in cash flows of the hedging instrument are expected to offset the changes in cash flows of the hedged item.

*Cash Flow Hedge.* When a derivative is designated as a cash flow hedging instrument, the effective portion of changes in the fair value of the derivative is recognized in other comprehensive income and accumulated in the hedging reserve. The effective portion of changes in the fair value of the derivative that is recognized in other comprehensive income is limited to the cumulative change in fair value of the hedged item. Any ineffective portion of changes in the fair value of the derivative is recognized immediately in the consolidated statements of income.

The Group designates only the intrinsic value of options and the change in fair value of the spot element of forward contracts as the hedging instrument in cash flow hedging relationships. The change in fair value of the time value of options, the forward element of forward contracts and the foreign currency basis spread of

financial instruments are separately accounted for as cost of hedging and recognized in other comprehensive income. The cost of hedging is removed from other comprehensive income and recognized in the consolidated statements of income, either over the period of the hedge if the hedge is time related, or when the hedged transaction affects the consolidated statements of income if the hedge is transaction related.

When the hedged transaction subsequently results in the recognition of a non-financial item, the amount accumulated in equity is transferred and included in the initial cost of the hedged asset or liability. For all other hedged transactions, the amount accumulated in equity is reclassified to the consolidated statements of income as a reclassification adjustment in the same period or periods during which the hedged cash flows affect the consolidated statements of income.

If the hedge no longer meets the criteria for hedge accounting or the hedging instrument expires, is sold, is terminated or is exercised, hedge accounting is discontinued prospectively. The amount that has been accumulated in equity is: (a) retained until it is included in the cost of non-financial item on initial recognition, for a hedge of a transaction resulting in the recognition of a non-financial item; or (b) reclassified to the consolidated statements of income as a reclassification adjustment in the same period or periods as the hedged cash flows affect the consolidated statements of income, for other cash flow hedges. If the hedged future cash flows are no longer expected to occur, the amounts that have been accumulated in equity are immediately reclassified to the consolidated statements of income.

#### *Embedded Derivatives*

The Group assesses whether embedded derivatives are required to be separated from the host contracts when the Group becomes a party to the contract.

An embedded derivative is separated from the host contract and accounted for as a derivative if all of the following conditions are met:

- (a) the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host contract;
- (b) a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- (c) the hybrid or combined instrument is not recognized as at FVPL.

However, an embedded derivative is not separated if the host contract is a financial asset.

Reassessment only occurs if there is a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required.

Embedded derivatives that are bifurcated from the host contracts are accounted for either as financial assets or financial liabilities at FVPL.

### Derivative Instruments not Designated as Hedges

The Group enters into certain derivatives as economic hedges of certain underlying exposures. These include freestanding and embedded derivatives found in host contracts, which are not designated as accounting hedges. Changes in fair value of these instruments are accounted for directly in profit or loss. Details are as follows:

#### *Freestanding Derivatives*

Freestanding derivatives consist of interest rate, currency and commodity derivatives entered into by the Group.

#### *Embedded Derivatives*

The Group's embedded derivatives include currency forwards embedded in non-financial contracts. As at September 30 and June 30, 2021 and December 31, 2020, the total outstanding notional amount of such embedded currency forwards amounted to US\$209, US\$215 and US\$126, respectively. These non-financial contracts consist mainly of foreign currency-denominated purchase orders, sales agreements and capital expenditures. The embedded forwards are not clearly and closely related to their respective host contracts. The net positive (negative) fair value of these embedded currency forwards amounted to (P299), (P30) and P148 as at September 30 and June 30, 2021, and December 31, 2020, respectively.

The Group recognized marked-to-market gains (losses) from freestanding and embedded derivatives amounting to (P521) and P442, and (P99) and P205 for the periods ended September 30, 2021 and 2020, June 30, 2021 and 2020, respectively.

### Fair Value Changes on Derivatives

The net movements in fair value of the derivative instruments are as follows:

	<b>September 30, 2021</b>	December 31, 2020
Balance at beginning of year	<b>P148</b>	P113
Net change in fair value of derivatives	<b>(521)</b>	442
	<b>(373)</b>	555

### Fair Value Measurements

The Group measures financial and non-financial assets and liabilities at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either: (a) in the principal market for the asset or liability; or (b) in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or most advantageous market must be accessible to the Group.

The fair value of an asset or liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their best economic interest.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3: inputs for the asset or liability that are not based on observable market data.

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing the categorization at the end of each reporting period.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy.

#### Fair Value Hierarchy

Financial assets and financial liabilities measured at fair value in the consolidated statements of financial position are categorized in accordance with the fair value hierarchy. This hierarchy groups financial assets and financial liabilities into three levels based on the significance of inputs used in measuring the fair value of the financial assets and financial liabilities.

The table below analyzes financial instruments carried at fair value by valuation method:

	<u>September 30, 2021</u>			<u>December 31, 2020</u>		
	<u>Level 1</u>	<u>Level 2</u>	<u>Total</u>	<u>Level 1</u>	<u>Level 2</u>	<u>Total</u>
<b>Financial Assets</b>						
Derivative assets	P-	P23	P23	P -	P172	P172
Financial assets at FVOCI	5,155	-	5,155	4,855	-	4,855
<b>Financial Liabilities</b>						
Derivative liabilities	-	322	322	-	24	24

The Group has no financial instruments valued based on Level 3 as at September 30, 2021 and December 31, 2020. For the period ended September 30, 2021 and for the year ended December 31, 2020, there were no transfers between Level 1 and Level 2 fair value measurements, and no transfers into and out of Level 3 fair value measurement.

## **10. Impact of Corporate Recovery and Tax Incentives for Enterprises (CREATE) Law**

The CREATE Act, which seeks to reduce the Corporate Income Tax Rates and to rationalize the current fiscal incentives by making it time-bound, targeted and performance-based, was passed into law on March 26, 2021. One of the key provisions of the CREATE Law is an immediate 5%-10% point cut in the corporate income tax rate starting July 2020. As a result, the Group has taken up in the books the effect of the application of reduced corporate income tax rate from 30% to 25%.

The impact on the consolidated financial statements of the Group based on balances as at and for the year ended December 31, 2020, which was taken up upon the effectivity of the CREATE law are as follows:

	Increase (Decrease)
<b>ASSETS</b>	
Prepaid expenses and other current assets	134
Deferred tax assets	(361)
	<b>(227)</b>
<b>LIABILITIES AND EQUITY</b>	
Income and other taxes payable	(687)
Equity reserves	(174)
Retained earnings	361
Non-controlling interests	273
	<b>(227)</b>
<b>INCOME TAX EXPENSE</b>	
Current	(821)
Deferred	185
	<b>(636)</b>

## 11. Other Matters

- a. There are no unusual items as to nature and amount affecting assets, liabilities, equity, net income or cash flows, except those stated in Management's Discussion and Analysis of Financial Position and Financial Performance.
- b. There were no material changes in estimates of amounts reported in prior financial years.
- c. There were no known trends, demands, commitments, events or uncertainties that will have a material impact on the Group's liquidity.
- d. There were no known trends, events or uncertainties that have had or that are reasonably expected to have a favorable or unfavorable impact on net sales or revenues or income from continuing operation.
- e. There were no known events that will trigger direct or contingent financial obligation that is material to the Group, including any default or acceleration of an obligation and there were no changes in contingent liabilities and contingent assets since the last annual reporting date. No material contingencies and any other events or transactions exist that are material to an understanding of the current interim period.
- f. Sales are affected by seasonality of customer purchase patterns. In the Philippines, food and alcoholic beverages, including those the Group produce, generally experience increased sales during the Christmas season. In addition, alcoholic beverages experience increased sales in the summer season, which typically slow down in the third quarter as a result of rainy weather. As a result, performance for any one quarter are not necessarily indicative of what is to be

expected for any other quarter or for any year and the Group's financial condition and results of operations may fluctuate significantly from quarter to quarter.

- g. There were no material off-statements of financial position transactions, arrangements, obligations (including contingent obligations), and other relationship of the Group with unconsolidated entities or other persons created during the reporting period, except for the outstanding derivative transactions entered by the Group as at and for the period ended September 30, 2021.
- h. The Group's material commitments for capital expenditure projects have been approved during the current year but are still ongoing and not yet completed as at end of September 30, 2021. These consist of construction, acquisition, upgrade or repair of fixed assets needed for normal operations of the business. The said projects will be carried forward to the next quarter until its completion. The fund to be used for these projects will come from available cash, short and long-term loans.
- i. The effect of Covid-19 in the performance of the Group is discussed in the Management's Discussion and Analysis of Financial Position and Financial Performance.

---

## **12. Events After the Reporting Date**

On November 10, 2021, the BOD of the Parent Company declared regular and special cash dividends to all common shareholders of record as of November 24, 2021 amounting to P0.40 and P0.10 per common share, respectively. Cash dividends for common shares is payable on December 10, 2021.

### **MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL POSITION AND FINANCIAL PERFORMANCE**

#### **INTRODUCTION**

The following discussion should be read in conjunction with the attached unaudited consolidated financial statements of San Miguel Food and Beverage, Inc. (“SMFB” or the “Parent Company”, formerly San Miguel Pure Foods Company Inc.) and its subsidiaries (collectively, referred to as the “Group”) as of and for the period ended September 30, 2021 (with comparative figures as of December 31, 2020 and for the period ended September 30, 2020). All necessary adjustments to present fairly the consolidated financial position, financial performance and cash flows of the Group as of September 30, 2021, and for all the other periods presented, have been made. Certain information and footnote disclosures normally included in the audited consolidated financial statements prepared in accordance with the Philippine Financial Reporting Standards have been omitted.

#### **Operating Segments**

The Group has three primary operating segments, namely, the Beer and Non-alcoholic Beverages (NAB) Segment, the Spirits Segment and the Food Segment.

The Beer and NAB Segment is engaged in the production, marketing and selling of fermented, malt-based and non-alcoholic beverages within the Philippines and several foreign markets.

The Spirits Segment is engaged in the production of hard liquor in the form of gin, Chinese wine, brandy, rum, vodka and other hard liquor variants which are available nationwide, while some are exported to select countries.

The Food Segment is engaged in (i) the processing and marketing of branded value-added refrigerated processed meats, canned meat products, and plant-based food, manufacturing and marketing of butter, margarine, cheese, milk, ice cream, specialty oils, salad aids, snacks and condiments, marketing of flour mixes and the importation and marketing of coffee and coffee-related products (collectively and hereinafter referred to as “Prepared and Packaged Food”); (ii) the production and sale of feeds and veterinary medicine (hereinafter referred to as “Animal Nutrition and Health”); (iii) the poultry and livestock farming, processing and selling of poultry and fresh meats (hereinafter referred to as “Protein”); and (iv) the milling, production and marketing of flour and bakery ingredients, grain terminal handling, foodservice, franchising and international operations (collectively referred to as “Others”).

#### **I. FINANCIAL PERFORMANCE**

##### **Nine months ended September 30, 2021 compared to nine months ended September 30, 2020**

The Group’s performance for the first nine months of 2021 continues to reflect the impact of the Coronavirus disease 2019 (COVID-19) pandemic, and the Group’s efforts to continuously adapt to evolving market opportunities and challenges.

Consolidated sales for the nine months ended September 30, 2021 amounted to P221,746 million, 14% higher compared to the same period in 2020, while the consolidated net income amounted to P24,184 million, 68% higher than in the same period in 2020. This is attributable to the strength of the Group’s brands across all business segments.

### Sales

Consolidated sales increased by 14%, from P194,559 million for the nine months ended September 30, 2020 to P221,746 million for the same period in 2021. The increase was mainly due to higher sales volumes of the Group and increase in selling prices. Sales in the Beer and NAB Segment increased by 13%, from P72,482 million in 2020 to P82,081 million in 2021, sales in the Spirits Segment increased by 21%, from P25,341 million in 2020 to P30,716 million in 2021, and sales in the Food Segment increased by 13%, from P96,736 million in 2020 to P108,949 million in 2021.

### Cost of Sales

The consolidated cost of sales increased by 11%, from P140,651 million for the nine months ended September 30, 2020 to P156,431 million for the same period in 2021. Cost of sales in the Beer and NAB Segment increased by 15%, from P44,594 million in 2020 to P51,188 million in 2021, cost of sales in the Spirits Segment increased by 23%, from P18,427 million in 2020 to P22,724 million in 2021, and cost of sales in the Food Segment increased by 6%, from P77,630 million in 2020 to P82,519 million in 2021. The increase was primarily due to the increase in sales volume of the Group and higher excise tax rates for the Beer and NAB and Spirits Segments.

The table summarizes the cost of sales for the nine months ended September 30, 2021 (in millions):

	Beer and NAB	Spirits	Food	Total
Inventories	P7,637	P9,136	P71,586	P88,359
Excise tax	38,894	12,467	-	51,361
Labor	1,167	244	1,349	2,760
Others	3,490	877	9,584	13,951
	<u>P51,188</u>	<u>P22,724</u>	<u>P82,519</u>	<u>P156,431</u>

### Gross profit

Consolidated gross profit increased by 21%, from P53,908 million for the nine months ended September 30, 2020 to P65,315 million for the same period in 2021. The increase was primarily driven by the increase in sales volume across the Group.

### Selling and Administrative Expenses

Consolidated selling and administrative expenses decreased by 3%, from P33,377 million for the nine months ended September 30, 2020 to P32,509 million for the same period in 2021. Selling and administrative expenses in the Beer and NAB Segment decreased by 3%, from P13,077 million in 2020 to P12,710 million in 2021, selling and administrative expenses in the Spirits Segment increased by 3%, from P3,804 million in 2020 to P3,914 million in 2021, and selling and administrative expenses in the Food Segment decreased by 4%, from P16,496 million in 2020 to P15,885 million in 2021 (includes other administrative expenses of the Parent Company amounting to P63 million). The decrease was primarily due to lower advertising and promotions, as well as distribution expenses.

### Interest Expense and Other Financing Charges

Consolidated interest expense and other financing charges decreased by 12%, from P2,816 million for the nine months ended September 30, 2020 to P2,477 million for the same period in 2021 as a result of interest savings of the Spirits Segment on settled loans, and lower interest rates for borrowings of the Food and Beer and NAB Segments.

### Interest Income

Consolidated interest income decreased by 39%, from P606 million for the nine months ended September 30, 2020 to P369 million for the same period in 2021 primarily due to lower average level of money market placements and lower interest rates.

### Gain on Sale of Investments and Property and Equipment

The Group recognized a gain of P201 from the disposal and sale of fixed assets for the first nine months of 2021.

### Other Income - Net

The Group recognized consolidated other income amounting to P217 million for the nine months ended September 30, 2021, which was 89% lower compared to consolidated other income of P1,916 million for the same period in 2020. The decrease was primarily due to higher marked to market losses in 2021 on valuation of the purchase order derivatives as a result of depreciation of the peso and smaller Tax Credit

Certificates issued by the Bureau of Internal Revenue in 2021 as compared to 2020 pursuant to the tax refund cases of the Beer Segment.

#### Net Income before Income Tax

As a result of the foregoing, consolidated net income before income tax increased by 54%, from P20,224 million for the nine months ended September 30, 2020 to P31,116 million for the same period in 2021.

#### Income Tax Expense

The income tax expense increased by 18%, from P5,866 million for the nine months ended September 30, 2020 to P6,932 million for the same period in 2021 due to the higher taxable income. Nonetheless, the Group benefitted from lower tax rates from the implementation of Republic Act No. 11534 also known as the Corporate Recovery and Tax Incentives for Enterprises Act (CREATE Law) this year, which reduced income tax rates from 30% to 25% effective July 2020.

#### Net Income

As a result of the foregoing, SMFB's consolidated net income increased by 68%, from P14,358 million for the nine months ended September 30, 2020 to P24,184 million for the same period in 2021. Net income of the Beer and NAB Segment increased by 27%, from P11,082 million in 2020 to P14,049 million in 2021, while the Spirits Segment increased by 43%, from P2,212 million in 2020 to P3,170 million in 2021. The Food Segment recognized net income amounting to P6,965 million (inclusive of other administrative expenses of the Parent Company) in 2021 compared to the net income of P1,064 million for the same period in 2020.

#### Net Income after Tax and Minority Interest

SMFB's consolidated net income after tax and minority interest increased by 104%, from P7,846 million for the nine months ended September 30, 2020 to P15,988 million for the same period in 2021. Net income after tax and minority interest of the Beer and NAB Segment increased by 27%, from P5,550 million in 2020 to P7,025 million in 2021, net income after tax and minority interest of the Spirits Segment increased by 60%, from P1,504 million in 2020 to P2,402 million in 2021, while net income after tax and minority interest of the Food Segment increased from P792 million in 2020 to P6,561 million (inclusive of other administrative expenses of the Parent Company) in 2021.

### **Business Highlights for the period ended September 30, 2021**

#### Beer and NAB

The Beer and NAB Segment's revenue continued to grow as consumption picked-up with the overall trend of easing COVID-19 restrictions. Year-to-date September 2021 consolidated revenue reached P82,082 million, 13.2% higher than consolidated revenue of P72,482 million in the same period in 2020 as a result of the increase in sales volume by 7.5%. Domestic operations contributed P74,006 million while international operations contributed US\$165.2 million.

Cost of sales increased by 14.8% to P51,189 million with the higher sales volume of both domestic and international operations and the increase in excise tax rate in the Philippines effective January 2021. Domestic operations accounted for P46,755 million while international operations accounted for US\$90.8 million.

Consequently, income from operations increased by 22.8% to P18,182 million. Domestic operations contributed P16,937 million while international operations contributed US\$25.8 million.

Interest income declined from P466 million to P192 million or 58.8% mainly due to lower interest rates on money market placements of both domestic and international operations.

Correspondingly, interest expense and other financing charges also decreased by 8.2% with the lower interest rates of outstanding loans.

Other income-net declined by 58.9% or by P1,003 million primarily due to lower San Mig Light tax refund received in 2021.

Income tax expense decreased by 16.9% or by P748 million as a result of the implementation of the CREATE Law this year which reduced income tax rates from 30% to 25%.

As a result of the foregoing, consolidated net income rose by 26.8% from P11,082 million to P14,049 million. Domestic operations contributed P12,637 million while international operations contributed US\$29.3 million.

Domestic operations' performance continued to improve with revenues reaching P74,006 million as of the third quarter of 2021, an increase of 13.1% or P8,598 million attributable to higher volumes.

Income from operations increased to P16,937 million due to volume improvement and continued cost management initiatives. San Miguel Brewery Inc.'s (SMB) favorable performance was aided by initiatives to boost demand for its brands such as relevant thematic campaigns and on-ground activations, as well as the nationwide and channel-specific consumer promotions.

As a result, year-to-date September 2021 net income of P12,637 million was 21.8% higher than in the first nine months of 2020.

San Miguel Brewing International Limited (SMBIL) registered US\$ 165.2 million in consolidated revenue as of September 30, 2021, 16.4% higher than in the comparable period in 2020 as a result of the 13.9% increase in volumes.

SMBIL made a strategic decision to rationalize and consolidate its China operations to improve profitability and efficiency. SMBIL ceased operations of San Miguel (Baoding) Brewery Co., Ltd. in North China, and did not renew the joint venture agreement for Guangzhou San Miguel Brewery Co. Ltd, which expired in 2020, in order to consolidate its South China operations into San Miguel (Guangdong) Brewery Co. Ltd.

Volumes of SMBIL's local and global San Miguel brands increased by 14.2% and 16.1%, respectively. Indonesia operations registered a significant improvement in volumes, despite higher COVID-19 cases this year, as it recovered sales volumes in its nationwide wholesaler network. SMBIL's Exports business sustained its volume growth trend from last year despite the continuing and different levels of restrictions in its exports markets with its continued programs in the modern trade off premise and wholesaler channels. Meanwhile, the South China, Vietnam, Hong Kong and Thailand operations registered declines due to more stringent levels of COVID-19 restrictions compared to the same period last year which primarily affected the sales of beer in the on-premise outlets. Hong Kong operations was able to keep the decline at a lower level by also growing the volumes in the modern trade off-premise and wholesaler channels to cushion the shortfall in the on-premise channels. SMBIL was also able to gain incremental volumes from its newly launched wheat ale, San Miguel Cerveza Blanca, in Thailand, Hong Kong, Taiwan, Vietnam and South Korea.

SMBIL's September year-to-date consolidated operating income was 84.7% higher than in the equivalent period last year at US\$25.8 million, due to improved volumes and lower fixed costs and the benefits of the restructuring of its China operations.

### Spirits

The Spirits Segment's revenues for the first nine months of 2021 of P30,716 million was higher than in the first nine months of 2020 by 21% mainly driven by volume growth led by Ginebra San Miguel Inc.'s flagship brand, Ginebra San Miguel. Likewise, gross profit grew by 16% from the same period in 2020 driven by the price increase, higher usage of second-hand bottles and lower alcohol cost.

Interest expense and other financing charges decreased by 73% due to savings on settled short-term and long-term loans. On the other hand, interest income increased by 71% as a result of higher short-term placements compared to same period in 2020.

Other income dropped by 37% mainly due to the impact of Peso against USD exchange rate on marked to market losses.

### Food

The Food Segment sustained its strong performance and posted consolidated revenues of P108,949 million for the first nine months of 2021, 12.6% higher compared to the same period in 2020, amidst

operational challenges brought about by the lingering COVID-19 pandemic. Revenues grew on the back of higher volumes and better selling prices across most businesses.

Protein, consisting of the poultry and fresh meats businesses, maintained its robust recovery and registered revenues of P48,572 million, 19.6% higher than in the first nine months of 2020. Fresh chicken selling prices stabilized as the business has been able to keep its inventory at optimum level, amidst the build-up of industry inventory due to the influx of imported frozen chicken. Despite the renewed lockdowns in the third quarter of 2021, the network of community-based outlets continued to expand and deliver incremental volumes through improved availability and easier consumer access. Meanwhile, movement restrictions on hogs and pork products due to African Swine Fever (ASF) forced the closure of several meat shop outlets in affected areas. Tight pork supply kept pork selling prices on the high side.

Animal Nutrition and Health, consisting of the feeds and veterinary medicines businesses, delivered revenues of P24,802 million, 9.1% higher than in the first nine months of 2020 on account of the consistently strong demand for free range fowl feeds, layer, duck and aquatic feeds. Sales of free-range fowl feeds grew by double-digit along with the onset of the breeding season. Layer and duck feeds sales volumes likewise rose by double-digit due to demand creation activities, promos and aggressive sales campaigns, while sales volume of aquatic feeds benefitted from the conversion of new farms and the recovery of farms affected by the Taal volcano eruption in 2020. On the other hand, demand for hog feeds remained dampened by ASF while sales performance of broiler feeds was affected by the volatile chicken prices.

Prepared and Packaged Food, consisting of the processed meats, dairy, spreads, biscuits, and coffee businesses, reported revenues of P29,029 million, 4.3% higher than same period in 2020, on account of increased sales volume, as well as better selling prices as a result of favorable sales mix. Flagship products such as Tender Juicy® hotdogs, nuggets, bacon and SPAM®, among others, posted double-digit increases. At the same time, new product offerings such as ready-to-eat viands, meat-free Veega® and seafood nuggets were well accepted by consumers and have registered robust growth.

The Food Segment's cost of sales increased to P82,527 million, up by 6.3% compared to same period in 2020 mainly on account of higher sales volume. Rising costs of some major raw materials such as soybean meal, corn, imported meat materials and oils, among others, also contributed to increased cost of sales.

Driven by the strong and consistent recovery of the Protein business, favorable selling prices, higher volume, improved product mix, and efficiency gains from the new company-owned plants, the Food Segment's gross profit rose to P26,423 million, 38.4% higher than in the comparable period in 2020.

Selling and administrative expenses of P15,871 million, exclusive of head office costs, was 3.4% lower compared to same period in 2020 mainly due to lower logistics cost, as the Food Segment benefitted from direct deliveries of its fresh poultry products from processing plants to customers. Optimized utilization of company-owned finished goods warehouses and dispatch points likewise helped in reducing selling and administrative expenses.

As a result, the Food Segment's operating income, exclusive of head office costs, quadrupled to P10,552 million, from P2,658 million for the same period in 2020.

### **Nine months ended September 30, 2020 compared to nine months ended September 30, 2019**

The Group saw the full impact of the COVID-19 pandemic during the first nine months of 2020.

The consolidated sales for the nine months ended September 30, 2020 amounted to P194,559 million, 14% lower compared to the same period in 2019, while the consolidated net income amounted to P14,358 million, 37% lower than in the same period in 2019. This is mainly attributed to the lower sales volume from the Beer and NAB Segment which was partially offset by the better performance of the Spirits Segment.

#### **Sales**

The consolidated sales decreased by 14%, from P226,365 million for the nine months ended September 30, 2019 to P194,559 million for the same period in 2020. Sales in the Beer and NAB Segment decreased by 30%, from P103,883 million in 2019 to P72,482 million in 2020, sales in the Spirits Segment increased by 18%, from P21,430 million in 2019 to P25,341 million in 2020, and sales in the Food Segment

decreased by 4%, from P101,052 million in 2019 to P96,736 million in 2020. The decrease was mainly due to lower sales volumes brought about by the pandemic.

#### Cost of Sales

The consolidated cost of sales decreased by 10%, from P156,038 million for the nine months ended September 30, 2019 to P140,651 million for the same period in 2020. Cost of sales in the Beer and NAB Segment decreased by 24%, from P58,338 million in 2019 to P44,594 million in 2020, cost of sales in the Spirits Segment increased by 19%, from P15,544 million in 2019 to P18,427 million in 2020, and cost of sales in the Food Segment decreased by 6%, from P82,156 million in 2019 to P77,630 million in 2020. The decline was primarily due to the decrease in sales volume in the Beer and NAB and Food Segments and the decrease in prices of key raw materials, which was partially offset by higher excise tax rates for the Beer and NAB and Spirits Segments.

The table summarizes the cost of sales for the nine months ended September 30, 2020:

	Beer and NAB	Spirits	Food	Total
Inventories	P7,113	P8,450	P66,819	P82,382
Excise tax	33,208	9,006	-	42,214
Labor	1,174	236	1,247	2,657
Others	3,099	735	9,564	13,398
	<u>P44,594</u>	<u>P18,427</u>	<u>P77,630</u>	<u>P140,651</u>

#### Gross profit

The consolidated gross profit decreased by 23%, from P70,327 million for the nine months ended September 30, 2019 to P53,908 million for the same period in 2020. This decrease resulted primarily from the decrease in sales volumes of the Beer and NAB and Food Segments.

#### Selling and Administrative Expenses

The consolidated selling and administrative expenses decreased by 9%, from P36,742 million for the nine months ended September 30, 2019 to P33,377 million for the same period in 2020. Selling and administrative expenses in the Beer and NAB Segment decreased by 25%, from P17,339 million in 2019 to P13,077 million in 2020, selling and administrative expenses in the Spirits Segment increased by 3%, from P3,677 million in 2019 to P3,804 million in 2020, and selling and administrative expenses in the Food Segment increased by 5%, from P15,726 million in 2019 to P16,496 million in 2020 (includes other administrative expenses of the Parent Company amounting to P49 million). The decrease was primarily due to lower advertising and promotions, as well as distribution expenses.

#### Interest Expense and Other Financing Charges

The consolidated interest expense and other financing charges increased by 22%, from P2,316 million for the nine months ended September 30, 2019 to P2,816 for the same period in 2020. The increase was mainly due to the higher interest-bearing debt balances of the Beer and NAB and Food Segments in 2020.

#### Interest Income

The consolidated interest income decreased by 37%, from P968 million for the nine months ended September 30, 2019 to P606 million for the same period in 2020. The decrease was primarily due to lower average level of money market placements of the Group in 2020.

#### Equity in Net Losses of Joint Ventures

The Group did not recognize consolidated equity in net losses of joint ventures in 2020 compared to the same period in 2019.

#### Loss on Sale of Investments and Property and Equipment

The Group recognized a consolidated loss on sale of investments and property and equipment amounting to P13 million for the nine months ended September 30, 2020 resulting from assets disposed during the period.

#### Other Income (Charges) – Net

The Group recognized a consolidated other income amounting to P1,916 million for the nine months ended September 30, 2020 compared to the consolidated other income of P303 million for the same period in 2019. Other income in 2020 was primarily due to the tax credit certificates received by the Beer and NAB Segment during the third quarter due to a favorable tax ruling, marked-to-market gains and foreign

exchange gains resulting from the appreciation of the Philippine Peso against other foreign currencies during the period.

#### Net Income before Income Tax

As a result of the foregoing, consolidated net income before income tax decreased from P32,348 million for the nine months ended September 30, 2019 to P20,224 million for the same period in 2020.

#### Income Tax Expense

The consolidated income tax expense decreased by 38%, from P9,426 million for the nine months ended September 30, 2019 to P5,866 million for the same period in 2020. This decrease was primarily due to lower consolidated taxable income.

#### Net Income

As a result of the foregoing, SMFB's consolidated net income decreased by 37%, from P22,922 million for the nine months ended September 30, 2019 to P14,358 million for the same period in 2020. Net income of the Beer and NAB Segment decreased by 44%, from P19,841 million in 2019 to P11,082 million in 2020, while net income of the Spirits Segment increased by 67%, from P1,325 million in 2019 to P2,212 million in 2020. The net income of the Food Segment decreased by 39%, from P1,756 million in 2019 to P1,064 million (inclusive of other administrative expenses of the Parent Company) in 2020.

#### Net Income after Tax and Minority Interest

As a result of the foregoing, SMFB's consolidated net income after tax and minority interest decreased by 38%, from P12,653 million for the nine months ended September 30, 2019 to P7,846 million for the same period in 2020. Net income after tax and minority interest of the Beer and NAB Segment decreased by 44%, from P9,952 million in 2019 to P5,550 million in 2020, net income after tax and minority interest of the Spirits Segment increased by 67%, from P901 million in 2019 to P1,504 million in 2020, and net income after tax and minority interest of the Food Segment decreased by 56%, from P1,800 million in 2019 to P792 million (inclusive of other administrative expenses of the Parent Company) in 2020.

### **Business Highlights for the period ended September 30, 2020**

#### Beer and NAB

##### *Domestic Beer Operations*

Domestic operations showed significant improvement in the third quarter of 2020 as SMB implemented programs to further support the shift from on-premise to home consumption, and provided support to its dealers and wholesalers to actively penetrate online selling channels. However, the first nine months of 2020 ended with domestic beer volumes lower by 39% compared to the same period in 2019. This resulted to domestic sales revenue of P65,408 million, a 30% drop from the same period in 2019. The drop was primarily driven by the lower sales volume despite the price increase implemented in March 2020.

Consequently, operating income declined to P14,116 million, lower by 48% than in the same period in 2019, and net income amounting to P10,378 million.

##### *International Beer Operations*

SMBIL registered US\$ 141.9 million in consolidated revenue, as of September 30, 2020, 27.1% lower than in the comparable period in 2019 as a result of the 26.2% shortfall in volumes.

SMBIL made a strategic decision to stop the operations in North China, even prior to the COVID-19 outbreak. As such, the North China unit ceased operations in end-January 2020 and is currently undergoing liquidation process. Excluding the North China operations, total volume was 14% behind the equivalent period in 2019. The impact of COVID-19 pandemic in all of the markets resulted in lower volumes of the local and global San Miguel brands by 31% and 2%, respectively.

The Indonesia and Thailand operations, where majority of the volumes are sold in on-premise channels, were the ones severely impacted by the pandemic. Large scale social restrictions in Indonesia and the extended state of emergency measures until end of October 2020 in Thailand led to the prolonged closure of beer selling on-premise outlets in the respective regions. Restriction on tourist arrivals in major destinations in the various markets where San Miguel is particularly strong is also still in effect. In South China, the government imposed total lockdowns in the first quarter of 2020 affecting operations of retail outlets, factories (including SMBIL's brewery) and shipping ports. The growth in wholesaler volumes and

the stable volumes in the modern trade-off premise channel helped managed the decline in the on-premise channel in the first half of 2020, while third quarter 2020 volume was supported by the gradual re-opening of on-premise outlets. On the other hand, Hongkong and Vietnam fared better than the other markets with year-to-date September 2020 volume at par with the same period in 2019. The Hong Kong operations was able to grow volumes in the modern trade off-premise and wholesaler channels to offset the volume shortfall in the on-premise channels. Similarly, Vietnam operations was able to offset the negative impact of lower sales of San Miguel brands with higher W1n Bia volumes. SMBIL's Exports business registered higher volumes in the first three quarters of 2020 as a result of higher off-premise volumes due to the shift to home consumption during the pandemic, with the off-premise channel being a significant channel in a number of markets particularly in Korea and United Arab Emirates. Given its wide global reach and the diversity of its markets, SMBIL Exports was able to balance the effects of the varying degrees of lockdown in the major markets. However, despite the easing up of restrictions in some of the markets, consumer confidence and spending intent remain low, particularly in on-premise channels.

SMBIL's September year-to-date 2020 consolidated operating income reached US\$ 14 million, 37.3% behind than the equivalent period in 2019 due to the decline in volumes, partly tempered by lower fixed costs, particularly sales and marketing expenses.

### Spirits

The Spirits Segment's revenues reached P25,341 million for the first nine months of 2020, 18% higher than the same period in 2019 despite the liquor ban imposed during the ECQ brought about by the COVID-19 pandemic.

Selling and administrative expenses slightly increased by 3% mainly due to marketing and logistics efforts in support of the higher sales for the period.

Interest expense and other financing charges decreased by 18% due to settlement of loans. On the other hand, interest income decreased by 28% due to interest income on receivable from Thai San Miguel Liquor Company Limited recognized only in 2019.

Consolidated net income as at the end of third quarter of 2020 was at P2,212 million, 67% higher than same period in 2019.

### Food

The Food Segment posted consolidated revenues of P96,736 million for the first nine months of 2020, 4.3% lower compared to same period in 2019. Sales were set back primarily by prevailing low poultry selling prices caused by the large frozen chicken inventory in the market, slowdown in the foodservice and retail operations resulting from the COVID-19 quarantine restrictions, and the continuing effects of the ASF on sales of fresh meats and commercial feeds. On the other hand, the Prepared and Packaged Food business sustained its good performance, which benefitted from consumers' demand shift to shelf-stable products amidst the new normal.

Protein, consisting of the poultry and fresh meats businesses, registered revenues of P40,627 million, 10.8% behind same period in 2019, still negatively affected by the pandemic. Inventory of frozen chicken significantly increased in the second quarter of 2020 due to the slowdown in sales to foodservice chains and lechon manok customers as a result of the temporary closure of operations during the ECQ period, and slow recovery even as the quarantine protocols were gradually eased. To deplete inventory, the business implemented an aggressive move out plan at lower selling prices resulting in a decline in profits. Sales through community resellers continually grew and has cushioned lost sales volume from the wet market channel which has been affected by weak foot traffic and limited market days in certain areas. The launch of pre-packed cut-ups and 'Magnolia Ready-to-Cook Fried Chicken' in Magnolia Chicken Stations® likewise mitigated volume decline in supermarkets caused by low foot traffic, while addressing consumers' health and safety concerns. Meanwhile, the ASF outbreak, which started in the third quarter of 2019, continued to unfavorably affect demand for pork.

Animal Nutrition and Health recorded revenues of P22,724 million, 4.8% lower than in the same period in 2019 primarily due to lower sales volume of hog and broiler feed types, as well as lower average selling prices on account of competitive price adjustments. Sales of hog feeds declined amidst the continuing contraction of the hog industry due to ASF-related mortalities and downsizing of farms. Sales of broiler feeds, on the other hand, went down as farmers opted to delay loading of chicks after incurring heavy

losses during the ECQ period. Meanwhile, sales growth of free-range feeds and additional volume coming from new duck and aquatic feeds customers partly tempered the decline in hog and broiler feeds sales.

Prepared and Packaged Food delivered revenues of P27,820 million, 8.7% higher than in the comparable period in 2019 driven by increased sales volume and better sales mix. Sustained demand for packaged and shelf-stable food products for in-home consumption boosted sales of premium-priced products such as Purefoods Corned Beef, SPAM®, Purefoods Tender Juicy® hotdogs, Magnolia cheese, margarine, milk and flour premix products. Double-digit growth in these categories, however, was partly tempered by the lower revenue contribution of the economy-priced hotdogs and other lower-priced products.

The Food Segment's cost of sales at P77,649 million, a 5.5% decrease from the first nine months of 2019, was due to lower cost of some of the major raw materials such as corn, soybean meal, feed wheat and anhydrous milkfat, complemented by cost-reduction initiatives.

Gross profit was at P19,088 million, up by 1.1% from the same period in 2019 relative to better product mix and cost breaks in some major raw materials.

Selling and administrative expenses, exclusive of head office costs, increased by 4.9% to P16,429 million, mainly due to COVID-19-related costs such as meals, swab tests and special incentives for production, logistics and merchandising personnel in an effort to continuously sustain supply chain operation and selling activities of the Food Segment in spite of quarantine restrictions. Regularization of the employees of third party service providers under the San Miguel Group also contributed to higher selling and logistics costs. Increased level of frozen chicken inventory resulted in higher warehousing costs.

As a result, the Food Segment's income from operations, exclusive of head office costs, was weighed down to P2,658 million for the first nine months of 2020, 17.1% lower than same period in 2019.

## **II. FINANCIAL POSITION**

### **Financial Position as of September 30, 2021 vs December 31, 2020**

Consolidated total assets as of September 30, 2021 amounted to P287,840 million, 4% or P11,588 million higher than December 31, 2020 level. The increase was primarily due to higher cash generated from operation and higher inventory balance. Consolidated total liabilities as of September 30, 2021 amounted to P145,491 million, 1% or P1,028 million higher than December 31, 2020 level. The increase was primarily due to higher trade payables and partially offset by a decrease in interest bearing debt and taxes payable.

Cash and cash equivalents increased by 30% or by P11,157 million due to higher cash generated from operations and net proceeds from the Beer and NAB Segment's and Food Segment's long-term debt.

Trade and other receivables decreased by 19% or by P3,876 million due to collection of receivables from peak season sales and lower credit sales.

Inventories increased by 9% or by P3,246 million due to higher ending inventory of the Food Segment in preparation for the Holiday season.

Prepaid expenses and other current assets decreased by 11% or by P822 million mainly due to the Food Segment's application of creditable withholding taxes, and the Beer and NAB Segment's utilization of remaining tax credit certificates.

Investments increased by 6% or by P297 million primarily due to movement in financial assets at fair value through other comprehensive income.

Property, plant and equipment increased by 5% or by P4,474 million due to the expansion projects of the Beer and NAB, and Food Segments.

Deferred tax assets decreased by 25% or by P715 million due to lower tax rates as an impact of the CREATE Law, and the Food Segment's application of Net Operating Losses Carry Over and Minimum Corporate Income Tax to tax due.

Loans payable decreased by 66% or by P7,070 million due to payments made by the Food Segment.

Long-term debt increased by 9%, or by P6,369 million due to new loan availments of the Beer and NAB, and Food Segments, which was partially offset by the Spirits Segment's settlement of loans.

Income and other taxes payable decreased by 25% or by P1,494 million due to the lower taxable income of the Group for the first nine months of 2021 compared to December 2020, and lower tax rates.

Dividends payable increased by 17% or by P8 million mainly due to the increase in unclaimed dividends payable of the Beer and NAB, and Spirits Segments.

Other noncurrent liabilities increased by 19% or by P243 million due to the Food Segment's additional set-up of retirement costs for the third quarter of 2021.

Consolidated total equity as of September 30, 2021 amounted to P142,349 million, 8% or P10,530 million higher than December 31, 2020 level. The increase was primarily due to the net income amounting to P24,184 million less the dividends declared by the Group amounting P13,216 million during the period.

### **Financial Position as of September 30, 2020 vs December 31, 2019**

Consolidated total assets as of September 30, 2020 amounted to P267,368 million, P1,401 million higher than December 31, 2019 level. The increase was primarily due to higher property, plant and equipment and inventories, which was partially offset by the decline in trade and other receivables. Consolidated total liabilities as of September 30, 2020 amounted to P139,766 million, 14% or P16,980 million higher than December 31, 2019 level. The increase was primarily due to the availment of long-term debt of the Food Segment and the issuance of Peso bonds of the Parent Company, which was partially offset by the settlement of short-term loans by the Spirits Segment.

Cash and cash equivalents decreased by 12% or by P4,380 million mainly due to the lower cash generated from operations, which was impacted by the COVID-19 pandemic particularly on the sales and cash position of the Beer and NAB Segment, and due to the Beer and NAB Segment's additional investment in equity securities. This was however partially offset by the increase in the Food and Spirits Segments' collection of receivables.

Trade and other receivables decreased by 35% or by P8,584 million due to collection of receivables from peak season sales of the Food Segment in December 2019 and lower credit availment of the Beer and NAB Segment's dealers.

Inventories increased by 15% or by P5,088 million mainly due to the Food Segment's higher finished goods inventory and purchases.

Prepaid expenses and other current assets increased by 23% or by P1,702 million due to the increase in excise taxes and unused tax certificates of the Group.

Investments increased by P4,792 million mainly due to the Beer and NAB Segment's additional investment in equity securities.

Property, plant and equipment increased by 7% or by P5,234 million due to the expansion projects of the Beer and NAB and Food Segments.

Right-of-use assets decreased by 11% or by P535 due to amortization during the period.

Biological assets – net of current portion decreased by 8% or by P231 million due to closure of some farms of the Food Segment impacted by the ASF.

Deferred tax assets increased by 19% or by P490 million due to the Food Segment's recognition of additional temporary deductible difference.

Notes payable decreased by 35% or by P5,623 million due to the settlement of short-term loans by the Spirits Segments and the Food Segment's availment of long-term loans.

Income and other taxes payable decreased by 17% or by P1,124 million mainly due to the Beer and NAB Segment's lower taxable income for the period, and the Food Segment's lower VAT and withholding tax payable, partially offset by the Spirits Segment's higher taxable income.

Lease liabilities decreased by 9% or by P391 million due to lower interest expense of the Food Segment for lease contracts about to end and amortization of lease liability.

Dividends payable increased by 12% or by P5 million mainly due to the increase in unpaid dividends payable of the Beer and NAB Segment.

Long-term debt increased by 49% or by P21,928 million due to the availment of long-term loans of the Food Segment and the issuance of Peso retail bonds of the Parent Company.

Other noncurrent liabilities increased by 14% or by P203 million due to the Food Segment's additional set up of retirement costs.

Consolidated total equity as of September 30, 2020 amounted to P127,602 million, 11% or P15,579 million lower than December 31, 2019 level. The decrease was primarily due to the redemption of outstanding preferred shares and dividends declared by the Group amounting P13,458 million during the period.

### III. SOURCES AND USES OF CASH

A brief summary of cash flow movements for the periods ended September 30, 2021 and 2020 is shown below:

	2021	2020
	<i>(in Millions)</i>	
Net cash flows provided by operating activities	P35,975	P26,059
Net cash flows used in investing activities	(9,789)	(17,115)
Net cash flows used in financing activities	(15,479)	(12,820)

Net cash from operations basically consisted of income for the period and changes in non-cash current assets, certain current liabilities and others.

Net cash used in investing activities include the following:

	2021	2020
	<i>(in Millions)</i>	
Additions to property, plant and equipment and investment property	(P6,788)	(P13,294)
Increase in biological assets, intangible assets and other noncurrent assets	(3,302)	(3,831)
Proceeds from sale of investments and property, and equipment	210	10
Cash dividends received	91	-

Net cash used in financing activities consist of the following:

	<b>2021</b>	<b>2020</b>
	<i>(in Millions)</i>	
Proceeds from short-term and long-term borrowings	P93,108	P99,448
Payments of short-term and long-term borrowings	(93,880)	(83,192)
Cash dividends paid	(13,208)	(13,453)
Payment of lease liabilities	(464)	(585)
Share issuance costs	11	(38)
Redemption of preferred shares	-	(15,000)
Decrease in non-controlling interest and others	(1,000)	-
Increase in other noncurrent liabilities	(46)	-

The effect of exchange rate changes on cash and cash equivalents amounted to P450 million and (P504) million for the period ended September 30, 2021 and 2020, respectively.

#### IV. KEY PERFORMANCE INDICATORS

The following are the major performance measures that the Group uses. Analyses are employed by comparisons and measurements based on the financial data of the periods indicated below.

KPI	As of September 30, 2021	As of December 31, 2020
Liquidity: Current Ratio	1.53	1.22
Quick Ratio	0.88	0.68
Solvency: Debt to Equity Ratio	1.02	1.10
Asset to Equity Ratio	2.02	2.10
Profitability: Return on Average Equity Attributable to Equity Holders of the Parent Company	23.66%	15.09%
Interest Rate Coverage Ratio	13.56	9.07
Return on Assets	11.43%	8.26%

	For the Nine Months Ended September 30, 2021	For the Nine Months Ended September 30, 2020
Operating Efficiency: Volume Growth	5.75%	(18.00%)
Revenue Growth	13.97%	(14.05%)
Operating Margin	14.79%	10.55%

The manner by which the Group calculates the above indicators is as follows:

KPI	Formula
Current Ratio	$\frac{\text{Current Assets}}{\text{Current Liabilities}}$
Quick Ratio	$\frac{\text{Current Assets} - \text{Inventory} - \text{Current Portion of Biological Assets} - \text{Prepayments}}{\text{Current Liabilities}}$
Debt to Equity Ratio	$\frac{\text{Total Liabilities (Current + Noncurrent)}}{\text{Equity}}$
Asset to Equity Ratio	$\frac{\text{Total Assets (Current + Noncurrent)}}{\text{Equity}}$

Return on Average Equity Attributable to Equity Holders of the Parent Company	$\frac{\text{Net Income Attributable to Equity Holders of the Parent Company}^*}{\text{Average Equity Attributable to Equity Holders of the Parent Company}^{**}}$
Interest Rate Coverage Ratio	$\frac{\text{Earnings Before Interests and Taxes}}{\text{Interest Expense and Other Financing Charges}}$
Return on Assets	$\frac{\text{Net Income}^*}{\text{Average Total Assets}}$
Volume Growth	$\left( \frac{\text{Sum of all Businesses' Sales at Prior Period Prices}}{\text{Prior Period Net Sales}} - 1 \right)$
Revenue Growth	$\left( \frac{\text{Current Period Net Sales}}{\text{Prior Period Net Sales}} - 1 \right)$
Operating Margin	$\frac{\text{Income from Operating Activities}}{\text{Net Sales}}$
